

## Is your Electrical Installation Safe?

The questions asked below provide the relevant questions and triggers that dictate when an EICR test and inspection is required.

- I am legally responsible for the safe condition of my Electrical Installation.
- I am liable for any injury that occurs from a poorly maintained Electrical Installation.
- I am aware of how often my Electrical Installation requires testing.
- I have a current Satisfactory copy of an Electrical Installation Condition Report.
- I am aware from the label on the front of the Distribution Board(s) of the date when the next test and inspection is due/required.
- I believe my next test and inspection is not due for at least three months.

If you are not able to answer *yes* to all or some of the above questions then you may need an EICR test and inspection carried out as soon as possible.
